## **DETAILED ACTION**

### ***Response to Arguments***

Applicant's arguments with respect to claims 1 to 10 have been considered but are moot in view of the new ground(s) of rejection.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 to 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Oguri et al (US Patent 4,572,751) or Ishihara (Japanese patent 364000245).

The abstract of Oguri or JP'245 discloses a non-austemper-treated spheroidal graphite cast iron alloy having a composition with constituents whose wt% ranges overlap those recited by the claims; such overlap renders applicant's composition prima facie obvious despite differences in non-overlapping areas, see *In re Malagari*, 182USPQ549 and MPEP 2144.05.

More specifically note example 1 on lines 5 to 15 of column 4 in Oguri, and example 3 in table 1 on page 273 of JP '245, which meet the claimed composition. Even though Oguri alloy additionally contain Bi, such would not appear to affect the basic and novel characteristics of the present invention and therefore would not be excluded from the claimed composition which recites "consists essentially" .

Moreover, the prior art elongation and tensile strength values are within or closely within those recited by the claims. See JP'245, Tables 2 to 6 on page 275 ; and Oguri, lines 65 to 67, column 4 and lines 1 to 5 of column 5.

Even though the prior art does not disclose the properties recited in claims 2 and 4 to 10, such would be expected in prior art alloys since compositional limitations are met, and in absence of proof to the contrary. See MPEP 2112.01 and *In re Best*, 195USPQ430.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
